Etched Glass Cleaning Instructions

If you have a **Positive Etched** Insert where the design is etched and the background is clear you would use just any regular glass cleaner for maintenance.

If you have a **Negative Etched** Insert where the design is clear and the background is etched you would first use any regular glass cleaner for maintenance. If that does not work then clean with rubbing alcohol. If that did not remove the soiled area follow the instructions below for stubborn stains on the etched area.

Stubborn Stain Instructions: Use the Goof Off 2 shown in the photo below (right hand spray bottle) for general purpose cleaning. Use the Goof Off in the can shown on the left of the photo below for more stubborn stains. **Important Note:** After using either of them **ALWAYS** make sure to clean your etched with a regular glass cleaner. You can purchase these two products at most Ace Hardware, Home Depot, Lowes and Walmart.

If you only want to purchase one of the products shown below buy the Goof Off that is in the can shown on the left in the photo below. You'll be amazed at how fast, easy and powerfully Goof Off® works to remove everything from dried paint to gummy, sticky messes including these tough soil removal challenges:. Goof Off® removes the tough messes that ordinary household cleaners can't. If you need more help call Dennis at
